RIEKE PUMP SIMPLIFIES DISPENSING OF FOAMING PRODUCTS

English Firm Selects RF08 for Consumer Leathergoods Cleaner

Bloomfield Hills, Mich. – September 26, 2006 – The Leather Training & Technical Dept Ltd. has selected the recently launched RF08 Foamer from Rieke Packaging Systems Englass, a unit of TriMas Corporation, as the ideal means for dispensing its leather cleaning products.

The RF08 dispenser draws product from the container and mixes it with air upon dispensing to enable it to foam without the use of traditional aerosol technology. The non-metal contact construction means the RF08 is compatible with a wide range of product formulations and ingredients.

The Leather Training and Technical Dept Ltd., based in Harrogate, England, offers a range of leather care and maintenance products for the consumer market. According to the company, foam cleaning is the most effective and safest way to clean leather. It recommends that its range of cleaners always be foamed up for even the smallest cleaning job. This process has now been made very simple by the availability of the Rieke Foamer.

The finger-tip actuated version supplied to The Leather Training and Technical Dept delivers an accurate 0.8ml dose with every dispense.

“Cleaning is an essential part of caring for leather furniture,” explains Judy Bass, business director of The Leather Training & Technical Dept Ltd. “The Rieke Foamer effectively produces a rich foam, which is essential for the cleaning process. It combines convenience and user-friendliness and is the ideal complement to our range of cleaning products.”

About Rieke

Rieke Packaging Systems Englass, located in Leicester, England, is part of TriMas' Packaging Systems Group, which manufactures and distributes innovative, premium-quality packaging products for the global commercial,

industrial and consumer sectors. Rieke has market leadership in steel and plastic closure caps, drum enclosures, rings and levers and dispensing systems.
